Development Corporation

Project Objectives

- Point of first call for assistance
- Identify Industry focused R&D
- Develop preliminary applications
- Matching Researchers & funding
- Timeline management
- Assistance with general process

Method

- Identify and contact relevant stakeholders
- Meetings to promote project
- Suitable projects and applicants identified
- Preproposals developed
- Industry projects submitted

Expected Outcomes

- Empower stakeholder groups
- co-management and more responsibility
- Develop skills
- Cash contribution / increased leverage
- Industry members Principal investigators
- 5+ stakeholder sponsored applications developed

Outcomes to Date

- Almost 30 proposals developed
 - profitability
 - efficiency
 - product development
 - environment
 - people development
 - industry development
- 7 funding sources/agencies
 - AusIndustry, NWC, FRDC, AFMA, NHT, DAFF, FIG

Outcomes to Date

- 60+ people advised through project
- Large number of Industry ideas
- Develop structured projects
- Link common threads (eg water)
- Skill and time shortage common
- A number of projects already funded

Improving the process

- Expand potential to pick up industry ideas
 - Role for SeaNet?
- More formal access to appropriate research providers
 - Role for SSA?
- Improved process through FRAB
 - Consider broader research scope
